Postdoctoral Positions in Condensed Matter Theory

University of Geneva, Switzerland

Research group led by Prof. Dmitry Abanin is looking for one or more highly motivated postdoctoral scientists in theoretical condensed matter physics. Our group conducts research in quantum many-body physics, including graphene and other topological materials, quantum transport, and highly non-equilibrium phenomena in quantum systems.

University of Geneva has a strong effort in condensed matter theory and experiment, led by groups of Prof.s T. Giamarchi, A. Morpurgo, J.-M. Triscone, C. Renner, D. van der Marel, and others.

The initial appointment will be for 1 year, with the possibility of renewal up to 3 years. The starting date is flexible, and the appointment can begin as early as Spring 2020. The candidates are required to have a PhD or equivalent when starting their postdoc appointment. A competitive salary and benefits package will be provided.

Interested candidates should send their CV, a short motivation letter and 2 or more recommendation letters directly to Dmitry Abanin, dmitry.abanin@unige.ch.
