POSTDOCTORAL POSITION IN CONDENSED MATTER THEORY AT MCMASTER UNIVERSITY

The condensed matter theory group at McMaster is looking for outstanding candidates for a postdoctoral position to begin in the summer or fall of 2019. Areas of interest include superconductivity, quantum magnetism, quantum dynamics, non-Fermi liquids, quantum criticality, topological phases, and holography. A successful candidate will have opportunity to interact with the vibrant theoretical and experimental condensed matter groups at McMaster University and Perimeter Institute. A PhD in Physics, familiarity with the tools of modern theoretical physics and research experience in the area of strongly correlated systems are required. Candidates should send their curriculum vitae, including a list of publications, and arrange to have three letters of reference sent to Catherine Kallin at kallin@mcmaster.ca or to Sung-Sik Lee at slee@mcmaster.ca by December 15, 2018.
